2027

21st INTERNATIONAL COURSE
AHMEDABAD, INDIA

FIRST ANNOUNCEMENT

Dear Colleagues,

It is our pleasure to invite you to the 21st TRICO – Transcatheter Intervention Course, to be held on February 13–14, 2027, in Ahmedabad, India.

Over the years, TRICO has evolved into a highly interactive forum for learning, discussion, and exchange of ideas in contemporary cardiovascular intervention. TRICO 2027 will build on this tradition with a strong focus on practical, case-based learning and the latest advances in interventional cardiology.

The program will feature case demonstrations, expert-led presentations, and interactive discussions covering contemporary coronary intervention, OCT and IVUS imaging, physiologic assessment including FFR and resting indices, coronary calcium management, structural heart interventions including TAVR, and emerging therapies such as renal denervation.

A key feature of TRICO will be its case-based and interactive format. Challenging cases will be presented and discussed with faculty, providing practical insights into clinical decision-making, procedural strategy, imaging, and the management of complex lesions.

We are pleased to bring together international and national faculty who will share their experience and perspectives across a broad range of contemporary interventional topics. The Angio CD Case Presentation Session will provide an additional opportunity for invited participants and faculty to present challenging cases and engage in open, collegial discussion.

Whether you are early in your interventional career or an experienced operator, TRICO 2027 is designed to provide practical knowledge that can be directly applied to clinical practice.

We look forward to welcoming you to TRICO 2027 in Ahmedabad for two days of focused learning, challenging cases, and meaningful scientific exchange.

Sincerely,

Tejas Patel
MD, DM, MSCAI, FACC, FESC
Course Director

LIVE TELECAST FROM APEX HEART INSTITUTE,
